WaveTrac

Software For JILS FWD

Get the best in FWD calibration software. Wave Trac was built by JILS FWD exclusively for use with FWD equipment. We have re-designed it from the bottom up and replaces both of our previous software tools.

- Makes Calibration much easier and faster than before.
- Combine your current lab and field software tools into one simple application.
- Reduce the cost of using and upgrading multiple software tools.
- Eliminates errors and reduces wasted time by automating manual steps and procedures.
- Improved quality of metrics through more sophisticated algorithms.
